Dec 2024 - Aug 2025 | [PokerGFX LLC](#)

Highlights:

- Migrated projects from .NET 4.5 to .NET 9, enabling access to the latest language features and improving runtime performance.
- Developed a configuration preset feature, allowing users to save, load, and apply over 50 customizable tournament and broadcast settings.
- Optimized startup by deferring non-critical component initialization to background threads, reducing perceived load time.
- Consolidated all PokerGFX applications into a single solution structure, improving maintainability and cross-project integration.
- Refactored the licensing system by separating license logic into focused classes, improving maintainability, increasing testability by introducing license test classes, and simplifying feature access control by exposing clear properties.
- Developed a WPF application to read, write and validate licences to KEYLOK hardware, facilitating offline license management for users.
- Automated the end-to-end build, signing, and publishing process for all PokerGFX projects, reducing manual effort and human error.
- Added support for continuous integration and deployment using GitLab runners.

Implemented accessibility guidelines and screen reader support in flagship desktop and cloud products using Windows Forms and React, going beyond mere compliance by refactoring code and redesigning interfaces for improved usability. Achieved innovation by introducing keyboard navigation, manipulation, and screen reader support to workflow diagrams, a feature previously non-existent on the market.

Highlights:

- Added keyboard navigation, manipulation and screen reader support to workflow diagrams components which at the time no one else had and did not exist on the market using C# and Windows Forms.

- Updated, refactored and developed custom accessibility objects for in-house and third-party Windows Forms components to enable screen reader support and keyboard navigation improving usability and overall user experience using C# and Windows Forms.
- Updated, refactored and redesigned a variety of controls and user interfaces to enable accessibility features which included form inputs, multi-level menus, dialogs, tree views, datagrids, toolbars, workflow diagrams, split views, tool selectors and others improving usability and overall user experience.
- Updated and refactored custom components to better integrate accessibility features and keyboard navigation using Javascript and React.
- Updated and created new user interface automated tests using C# and White Framework.
