

Software Developer

Spanish

English

I have great adaptability, the ability to work collaboratively with cross-functional teams, learn new skills quickly and am always interested in new challenges. I possess good communication skills and can tackle problems and situations with sensitivity and proactively. I consistently contribute to the achievement of both team and personal goals, don't hesitate to ask what I don't know, do the research and get things done.

Experience

Vail Resorts via Genpact

Jan 2026 - Present

PokerGFX LLC via Toptal

Dec 2024 - Aug 2025

- Migrated projects from .NET 3.5 - 4.5 to .NET 9, enabling access to the latest language features and improving runtime performance.
- Developed a configuration preset feature, allowing users to save, load, and apply over 50 customizable tournament and broadcast settings.
- Optimized startup by deferring non-critical component initialization to background threads, reducing perceived load time.
- Refactored the licensing system by separating license logic into focused classes, improving maintainability, increasing testability by introducing license test classes, and simplifying feature access control by exposing clear properties.
- Developed a WPF application to read, write and validate licences to KEYLOK hardware, facilitating offline license management for users.
- Automated the end-to-end build, signing, and publishing process for all PokerGFX projects, reducing manual effort and human error.
- Added support for continuous integration and deployment using GitLab runners.

CGi, LLC via Toptal

Jul 2024 - Feb 2025

I addressed user-reported issues by fixing bugs across the website, while also simplifying the codebase and centralizing database access to improve overall maintainability. In addition, I updated various web pages by replacing text and images and refining layouts to enhance both functionality and user experience.

Alteryx via Toptal

Aug 2020 - Jan 2024

Implemented accessibility guidelines and screen reader support in flagship desktop and cloud products using WinForms and React, going beyond mere compliance by refactoring code and redesigning interfaces for improved usability. Achieved innovation by introducing keyboard navigation, manipulation, and screen reader support to workflow diagrams, a feature previously non-existent on the market.

- Added keyboard navigation, manipulation and screen reader support to workflow diagrams components which at the time no one else had and did not exist on the market using C# and WinForms.
- Updated, refactored and developed custom accessibility objects for in-house and third-party WinForms components to enable screen reader support and keyboard navigation improving usability and overall user experience using C# and WinForms.
- Updated, refactored and redesigned a variety of controls and user interfaces to enable accessibility features which included form inputs, multi-level menus, dialogs, tree views, datagrids, toolbars, workflow diagrams, split views, tool selectors and others improving usability and overall user experience.
- Updated and refactored custom components to better integrate accessibility features and keyboard navigation using Javascript and React.
- Updated and created new user interface automated tests using C# and White Framework.

Fremantle Productions

Apr 2021 - May 2021

Designed and developed a web application enabling Show Producers to work remotely, maintaining seamless access to live camera streams during TV show broadcasts, despite COVID-19 restrictions.

Reebok CrossFit Games 2020

Jul 2020 - Aug 2020

Developed web application tailored for mobile devices, enabling athletes to seamlessly stream or upload their trial and competition videos for review by judges. This platform facilitated remote interaction between athletes and judges, thereby overcoming geographical constraints imposed by the COVID-19 pandemic

Advanced Audio Systems via Toptal

Mar 2020 - Aug 2020

Developed and updated various desktop and web applications to improve customer service, streamline business operations, and automate time-consuming tasks, enhancing overall efficiency and productivity for the organization.

- Updated the client's primary WinForms based application, incorporating their new branding and adding innovative features.
- Updates and enhancements to the company's management website.
- Created a checkout page with customizable DVD packaging options and integrated Stripe payment processing.
- Designed and developed a mobile web app allowing users to stream live events directly from their mobile devices, enhancing customer experience by reducing wait times and enabling on-the-go access to the company's services.
- Developed an application to automate DVD ISO image creation from MP4 videos, utilizing Windows Services for efficient execution of lengthy tasks, and paired with a WPF desktop app for service management and notification display.

Evolution Software via Toptal

Mar 2019 - Jan 2020

Implemented Entity Framework to streamline database interactions, automating repetitive tasks and reducing code complexity. Optimized database queries and stored procedures for faster results. Developed modules using a custom framework built on top of ASP.NET. Exposed frequently used functionality via Web Services. Replaced server-side controls with client-side rendering and asynchronous requests, enhancing performance and user experience.

- Created modules using their custom framework built on top of ASP.NET for specific clients.
- Added an Entity Framework data layer replicating and automating actions taken by their custom data access layer which works with ADO.NET.
- Added Web API to reduce full-page postbacks in several commonly used pages and KnockoutJS for client side datagrid processing which greatly improved overall performance and user experience.
- Edited database queries, columns and stored procedures to improve performance and get faster results.

MDLive, Inc. via Nearsoft

Sep 2015 - Aug 2019

I was involved and worked alongside product design, UX, DevOps and other development teams to build, integrate and deploy a WebRTC conferencing solution composed of several back and front end services and components.

- WebRTC solution with audio recording composed of signaling server, Javascript and C# clients, Azure Storage, Queues and Functions.
- Ruby gem to map Surecript API request and response messages between JSON and XML.
- Added Office 365 authentication to UWP application.
- Worked with iOS and Android development teams to help with integration of video conferencing application
- Worked with DevOps team to help with infrastructure provisioning and deployment of server-side applications on Azure.
- Worked with offshore team to help debug and deploy a payment gateway written in ASP.NET.

D4 Software via Toptal

Apr 2015 - Jun 2015

Worked on various development projects for ASP.NET MVC websites, focusing on enhancing user experience and email sending and tracking features.

American Mortgage Consultants via Toptal

Jan 2013 - Sep 2014

Designed and developed multiple solutions and components to enhance claims processing efficiency and streamline due diligence activities, thereby optimizing business operations.

Hildebrando

Mar 2011 - Oct 2011

Migrated multiple sections of an existing web application used for insurance claim management from ASP to ASP.NET. Additionally, created new components to support additional features.

Tiempo Development

Nov 2007 - Jan 2010

Implemented several software components, including synchronization and compression of audio and video content, packaging of presentations into self-contained executables, integration of image and video search APIs with retrieval capabilities and chart components.

Cambio Sonora

Oct 2004 - Jan 2006

Web development for newspaper's website and intranet, while also offering technical support and collaboration with the IT department.

arex Rxchange GmbH via Toptal

Oct 2014 - Feb 2015

Worked on ASP.NET MVC components to improve operations within an online B2B marketplace for wholesale dealers in the EU.

Serpico DEV

Oct 2011 - Jan 2013

Platform for Career Tutors to manage and review professional profiles created by College Students. Collaborated with the AppointmentPlus development team to create a Web API and Outlook Plugin.

Nearsoft

Jul 2010 - Mar 2011

As part of the YottaMark engineering team, I Developed various components for a traceability software that tracks the origin and freshness of food.

e-Business Consultores

Jan 2006 - Nov 2007

Developed web applications creating a range of solutions that included content management systems, e-learning, e-commerce, task tracking, digital signature integration, and others.

Dextro International

May 2000 - Oct 2004

Designed and developed dynamic websites with e-commerce, content management and other custom solutions.

Jan 2026
